Field Record: SL-PADDY-MINNERIYA

Minneriya, Polonnaruwa District. Dry Zone, irrigated from Minneriya tank. Cultivator W. M. Perera.

Document AV-FR-01 | Category: farm_record | Record current to 2 October 2026
Synthetic farm record for teaching. The fields are AgriVibe demonstration fields; cultivators, dates, observations and satellite values are invented and consistent with the AV-KB-001 thresholds.

Field details

Field id: SL-PADDY-MINNERIYA
Location: Minneriya, Polonnaruwa District
Agro-ecological zone: Dry Zone
Water regime: Irrigated, Minneriya tank, left bank channel
Cultivated extent: 1.6 hectares
Agrarian Service Centre: Hingurakgoda
Cultivator: W. M. Perera

2026/27 Maha season

- 18 September 2026: first ploughing completed.
- 30 September 2026: second ploughing and levelling completed.
- 1 October 2026: basal fertiliser applied, quantity as per the Grama Niladhari division recommendation.
- 2 October 2026: sowed certified Bg 300 seed paddy (3-month age class), broadcast method.
- Cultivator's plan: first top dressing about two weeks after sowing, subject to weather.

Table 1. Maha 2026/27 satellite observations

24 Sep-1 Oct 2026. Mean NDVI: 0.12; Std dev: 0.020; CV: 0.17; Uniformity: moderately_variable; Valid observations: 1; Data quality: poor.

One cloud-affected observation, taken before emergence. No trend is available for this season yet.

2026 Yala season (completed)

- 5 May 2026: sowed Bg 300, broadcast.
- 18 to 21 June 2026: heavy rainfall. The north-east corner of the field held standing water for three days afterwards.
- 30 June 2026: AgriVibe advisory issued for a decline with heavy rainfall and an uneven field; inspection of the north-east corner's standing water and drainage recommended.
- 2 July 2026: cultivator cleared the drain at the north-east corner.
- 4 August 2026: harvested.

Table 2. Yala 2026 satellite observations

20-27 May 2026. Mean NDVI: 0.24; Std dev: 0.030; CV: 0.12; Uniformity: moderately_variable; Valid observations: 2; Data quality: moderate.
10-17 Jun 2026. Mean NDVI: 0.46; Change: +91.7%; Trend: significant_increase; Std dev: 0.060; CV: 0.13; Uniformity: moderately_variable; Valid observations: 2; Data quality: moderate.

24 Jun-1 Jul 2026. Mean NDVI: 0.43; Change: -6.5%; Trend: moderate_decline; Std dev: 0.110; CV: 0.26; Uniformity: uneven; Valid observations: 3; Data quality: moderate.
8-15 Jul 2026. Mean NDVI: 0.69; Change: +60.5%; Trend: significant_increase; Std dev: 0.050; CV: 0.07; Uniformity: uniform; Valid observations: 4; Data quality: good.
22-29 Jul 2026. Mean NDVI: 0.58; Change: -15.9%; Trend: significant_decline; Std dev: 0.050; CV: 0.09; Uniformity: uniform; Valid observations: 4; Data quality: good.

Cultivator notes

Drainage in the north-east corner is slow after heavy rain. Straw from the Yala season was incorporated into the soil during the first ploughing.
